## SEVERE SERVICE SKID STEER – ULTRA GUARD®, ULTRA GUARD® LVT

ULTRA GUARD® – New technology built in with a super rugged heavy duty construction and an abrasion resistant tread compound. Add in an “Ever Compensating” footprint that maximizes performance and durability through its entire life cycle and you have a severe service tire designed to perform even in the most demanding conditions. Extra deep tread depth and heavier ply ratings make this tire a “Must Have” for extreme operating applications. LVT design targeted for hard surface/sharp abrasion conditions.
